SEÉDS

For Garden, Lawn and Farm

Rennie & Pino

41 Washington St. Cor. Eddy Providence, Rhode Island

RENNIE @ PINO'S Park Lawn Grass Mixture

In our lawn mixture we use only the highest quality, extra clean seed, and free from weed seeds, which abound in inferior grades. We use only the choicest low growing grasses, and a lawn produced from our seed will maintain a rich, dark, velvety appearance and a permanent sod.

Qt., 20c.; I-2 Peck, 60c.; I Peck, \$1.00; I Bu., \$3.50.

The Preparation and Care of a Lawn

The ground must first be thoroughly prepared by draining, if necessary, and spade or plow to the depth of 6 to 12 inches, according to the nature of the soil, applying a liberal quantity of well decomposed manure, bone meal, or pulverized sheep manure; the latter we recommend as being lasting in effect, not liable to burn the grass, and free from weeds. Clean the ground thoroughly and rake perfectly smooth and level, as much of the success depends upon this part of the preparation. The seed should be sown on a calm day, that it may be applied evenly and at the rate of four bushels per acre, or one quart is sufficient for 300 square feet. After the seed is sown the ground should be rolled with a light roller or evenly tamped with the back of a spade. The plat should be mowed every ten days from May to September, using a sharp scythe in preference to a mower until a close turf is formed. Frequent mowing and rolling is necessary to maintain a close even turf. April and September are the best months for sowing lawn seed.

For Lawn Dressing use

Pulverized Sheep Manure

CATALOGUE

OF

Flower, Vegetable and Field ...Seeds..

Bulbs, Fertilizers, Garden Implements, Etc.

RENNIE @ PINO Seedsmen

Washington, corner Eddy Street, Providence, R. I.

In presenting our catalogue for the coming season, we wish to thank our many friends for their liberal patronage in the past, and to solicit their favors for the future.

SELECTION OF STOCK. Our connection with the seed trade for more than twenty years should have eminently fitted us to secure stocks that will prove satisfactory to the most critical trade, as we have been able to demonstrate to those who have trusted us with their seed orders.

LOCATION OF STORE. Our store will be found on the northwest corner of Washington and Eddy streets, one block from Dorrance or Westminster streets, and within a short distance of the Union Railroad Station.

SEEDS BY MAIL. For the benefit of out-of-town buyers, we pay postage on all seeds ordered in packets, ounces and one-fourth pounds. Add for prepayment of postage on large quantities at the rate of eight cents per pound. Peas and Beans, fifteen cents per quart. Corn ten cents per quart.

EARLY ORDERS are always advisable, as our stock of many varieties is liable to be exhausted early and many times good stocks are not obtainable later.

PACKING AND DELIVERY. We make no charge for boxes and packing and deliver all goods free within the city limits. Seamless bags we charge fifteen cents and small cloth bags ten cents, each.

While we exercise the greatest care to have all seeds pure and reliable, we do not give any warranty, expressed or implied. If the purchaser does not accept the seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

RENNIE & PINO.

VEGETABLE SEEDS

All Vegetable Seeds except Peas, Beans, Corn and those otherwise mentioned are put up in 5c. packages. We Send Free by Mail all vegetable seeds in packages, ounces and one-fourth pounds; larger quantities, add postage at 8c. per pound. Peas and Beans, 15c. per quart. Corn, 10c. per quart.

ASPARAGUS

One ounce to 40 feet of drill.

Sow the seed in spring in drills 15 inches apart; the following spring transplant to permanent beds. Plant for private use in rows 6 inches apart, and allow 12 inches in the rows, covering the roots 6 inches. For market on a large scale set 4 by 2 feet.

Oz. 1/10. lb.

BEANS, DWARF OR BUSH

One quart to 100 feet of drill.

For succession bush beans should be planted at intervals of two weeks from May until August. Make drills two feet apart and two inches deep.

Ot. ½pk.

Stringless Green Pod Extra
early, stringless, round pod.
Very prolific and excellent
quality 30 1 00

Extra Early, Red Valentine
An excellent round green

podded sort . . . 25 75

Early Yellow Six Weeks A

popular flat podded variety,

Dwarf Horticultural An excellent shell bean . 30 90 Goddard, or Boston Favorite Larger than the preceding variety. A popular market

variety 30 90

Low's Champion Recommendable as a string or shell bean 30 90

Improved Golden Wax A favorite yellow podded variety; pods flat. . . 40 I 50

BEANS, POLE OR RUNNING

One quart to 150 hills.

The planting of pole beans should be delayed a week or more after the planting of the early dwarf sorts. Make hills about 3 feet apart and 1 to 2 inches deep, and plant 5 or 6 seeds in each hill; thin to 3 plants in each hill when well established. Limas

should not be planted until weather becomes warm and settled. Flat beans should be placed in the soil edgewise, eye down.

Qt. ½pk. Horticultural Pole A very prolific shell bean

BEET

One ounce to 50 feet of drill; 5 to 6 pounds per acre.

Sow early as ground can be worked in the spring, and for succession follow every two weeks until July. For main crop sow last of May. Light sandy loam well enriched with stable manure is best adapted and should be plowed and harrowed until very fine. Make drills one foot apart, and when well up thin to four or five inches in the row.

Oz. ¼lb. lb. extra Early Egyptian A very early flat, blood red sort. Popular for first planting and forcing,

Pk. bu. Early Yellow Canada Very early; eight rowed. Longfellow Ears average 12 to 15 inches in length. 50 I 75 Sanford Ears large and small cob, white kernel. 50 I 75 Red Cob Ensilage Sweet, tender and juicy, producing abundance of foliage. I 50 50 Improved Leaming Ears large and handsome, deep grain, small cob. 50 1 50 Sweet Fodder For cutting green for stock. 60 2 00

CORN SALAD OR FETTICUS

Used as a salad. Is sown in early spring, in rows a foot apart, and is fit for use in six or eight weeks from the time of sowing.

Oz. 1/1b. 1b.

CRESS, OR PEPPER GRASS

A well-known pungent salad; cover very slightly, sow at frequent intervals to keep up a succession; to be used before the flowers appear.

Extra Curled Very fine; may be cut two or three times 10 20 50 Upland Hardy perennial; adapted to any soil, wet or dry. A very rapid grower and ready for use very early in spring; pkt., 10c,; oz., 75c. Water Cress Hardy perennial aquatic plant.

40 I 25 4 00

CUCUMBER

One ounce to 50 hills; 2 lbs. per acre.

Cucumbers succeed best in warm, rich, sandy loam. Plant when all danger of frost is past, in hills about four feet apart each way, the hills should be previ-ously prepared by mixing thoroughly with the soil of each a shovelful of well rotted manure; sow for pick-ling from the middle of June to the middle of July. Price except where noted oz., 10c.; 1/4 lb., 35c.; lb., \$1.25.

Improved White Spine One of the best varieties for table use.

White Spine Forcing A special strain for cultiva-tion under glass. Fruit grows very even in size; color, dark green. . 30 I 00 4 00 Early Russian The earliest in cultivation; small and productive . .

Early Cluster Length about 5 inches; tender and productive

¼lb. Oz. 1b. Green Prolific Excellent for summer use and for

Improved Long Green Ten to twelve inches in

Everbearing

an ordinary ridge cucumber, or as a climber.

English Frame Telegraph For growing in hot beds. Pkt. 25c.

DANDELION

One ounce will sow 100 feet of drill; two pounds to one acre.

Sow in May or June in drills a foot apart, press the earth firmly over the seed, cultivate during summer, cover lightly with straw during winter, and the fol-lowing spring the leaves will be fit to cut. The roots when dried and roasted are often employed as a substitute for coffee.

Improved Broad-Leaved Pkt., 10c.; oz., 35c.; 1/1b., \$1.25; lb., \$4.00.

EGG-PLANT

One ounce will produce about 1000 plants.

The seed should be sown in hot beds the first week in April. Plant out about June 1st, about two and a half feet apart. The Egg-Plant will thrive well in any good garden soil

Improved New York Spineless Quite free from spines, fruit of large size, and perfect form; two weeks earlier than the old variety. Pkt., roc.; oz., 35c.; 1/1b., \$1,25.

ENDIVE

One ounce will sow 150 feet of drill

Sow in drills one foot apart, thin out to ten inches apart, blanch when the leaves are about nine inches long, by drawing them together and tying them long, by

Green Curled Very hardy, leaves dark green, ten-

Batavian Broad-leaved. Leaves long and broad, chiefly used in soups 15 45 1 50

KOHL RABI

The seeds of this plant may be sown at the same period as the Swedish or Rutabaga Turnip, and may be cultivated in the same way, remembering to leave the chief part of the stems uncovered by the earth. The bulbs may be kept sound and nutritious until late in the spring, even later than those of Turnips

Early White Vienna The best variety,

60 200 Early Purple Vienna Later than the white,

20 60 2 00

LEEK

One ounce will sow 100 feet of drill.

The Leek is very hardy and easily cultivated. Sow in April in drills one foot apart, and transplant in July into rows fifteen inches apart, and six inches from each other in the rows. The soil should be rich, but not fresh manured.

Large American Flag The kind mostly grown for

LETTUCE

One ounce will sow 100 square feet or 120 feet of drill.

The earliest sowing may be made in February or March under glass, with slight heat. For later supplies, sow in the open ground, as the season will permit, thin out well and set in rows two feet apart, and a foot between the plants. Lettuce requires good ground and abundant moisture.

Oz. 1/1b. 1b. R. & P. Special Hothouse Select stock. Adapted for culture in greenhouses and hot beds.

40 125 Boston Market Fine for cold frames or open . . . 15 40 I 25 leaf; an excellent sort 20 50 I 50 Golden Queen Excellent for forcing; medium size, crisp and tender . 25 Black-Seeded Tennisball Heads close and hard.

Miller's Cream Skin very thin, dark green; flesh salmon and excellent flavor 10 30 I 00 White Japan Very early and prolific, medium size; flesh green, thick and very sweet . . 10 30 1 00

MELON—WATER

One ounce to 30 hills; 4 to 5 pounds per acre.

Plant in hills as directed for Musk Melons, and treat in all respects the same except that the hills should be about eight feet apart. Price, all varieties, oz., 10c.; 41b., 20c.; lb., 60c.
Cole's Early Medium size; flesh bright red; excel-

lent quality.

Phinney's Early Very early and sweet; flesh deepred. Kleckley's Sweet Vines vigorous and productive;

flesh bright red and exceedingly sweet.

Hungarian Honey Very early, nearly round, dark green skin, brilliant red flesh.

Mountain Sweet One of the best; color dark green. Black Spanish Large; very dark green; flesh deep red; sugary.

Citron For preserves only.

Cuban Queen Large variety; flesh bright scarlet, crisp and sweet.

Ice Cream One of the earliest; nearly round; of pale green color; flesh scarlet, solid, crisp and very sweet.

MUSHROOM

Mushrooms may be grown in a warm cellar or shed in winter, or in the open air in summer. Take partially dry fresh horse manure and lay it in a heap to ferment; turn and mix it well every few days, and when well and equally fermented, which will be in from ten to fifteen days, it may be made into a bed four feet wide and about two feet deep, mixing it well together and beating or treading it firmly. As soon as the temperature of the bed falls from 75 to 50 degrees the spawn may be inserted, in pieces about the size of a walnut, about two inches deep and six inches apart. Cover with loamy soil about two inches deep and beat it down evenly and firmly. Finish off with a covering of clean straw or hay about a foot thick. Water when necessary with luke-warm water, and expect mushrooms in from four to six

Best English Mill Track per brick, 15 cts.

NASTURTIUM

The seeds while young and succulent are pickled and used as capers. Sow the seeds in drills one inch deep, the tall grown by the side of a fence, or supported by a trellis.

Tall Mixed.

Dwarf Mixed

OZ. ½lb. lb.

10 30 1 00

Dwarf Mixed

OKRA, OR GUMBO

One ounce to 75 hills.

Sow early in May, in drills two inches deep, setting the plants from two to three feet apart.

ONION

One ounce will sow 100 feet of drill; 6 lbs. per acre.

A rather strong, deep, rich, loamy soil is considered most suitable for onion culture. Prepare ground the previous autumn by plowing or spading deeply and applying a heavy coat of well-rotted barn-yard manure. Sow seed early in spring in shallow drills one foot apart, covering with fine soil, and press down by the use of a light roller or the back of a spade. Thin plants to 4 inches and keep free from weeds.

Our Onion Seed is all Eastern grown.

Yellow Globe Danvers True Buxton type. A standard sort, deep globe shape, large size, mild flavor, and a good keeper 15 50 1 50

Large Red Weathersfield One of the most productive and longest keeping sort. Large size, flat, purplish red color. 15 50 1 50

Squash Medium size, productive. Ruby King Very mild, fruits 4 to 6 inches long; excellent for stuffing.

Long Red Cayenne Bright red, slender pods, very

pungent.

Red Cherry For pickling; cherry shaped. Chilli Very small, red, very pungent.

POTATOES

All the leading varieties, choice Maine grown stock at lowest market prices.

PUMPKIN

Pumpkins are now principally cultivated for agricultural purposes. They are usually planted in fields of corn or potatoes, but may be profitably raised in fields by themselves. Sow first of May, in hills eight feet apart.

02. 1/1b. 1b. Yellow Sugar Very sweet; an excellent table sort... . IO 20

Connecticut Field For feeding stock . 05 15 40

Large Cheese Flat, one of the best varieties for family use, 10 20 60

RADISH

One ounce will sow 100 feet of drill.

Radishes require a light, rich, sandy soil. For an early supply sow in a hot bed in February, care being taken to give plenty of ventilation. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks.

We carry but one grade; the Best.

Early Scarlet Globe For forcing in greenhouses, hot beds and cold frames or open ground sowing, this is one of the very best. Globe shaped, fine scarlet color, crisp, mild and tender. Small tops. The market gardeners' favorite.... 10 25 75 Crimson Giant Turnip Desirable for forcing or out door planting, and while growing to unusual size, it is always tender, crisp and mild flavored.

Price of the following varieties . . . 10 20 60

Early Scarlet Turnip A standard variety for market or family use.

French Breakfast Olive shaped, bright scarlet, White tipped. A favorite sort.

Long Scarlet Short Top Long, smooth, crisp and tender.

Scarlet Turnip White Tipped Very early, excellent quality.

Wood's Early Frame Long, red, crisp, good for forcing or out door.

White Giant Stuttgart Top shape, white skin and flesh, a summer variety but does not become pithy until late and can be stored for winter.

Olive Shaped Scarlet Firm, crisp, good flavor.
White Strasburg A favorite summer variety.
White Turnip A favorite summer variety.
Long Black Spanish An excellent winter sort.
Round Black Spanish A winter variety.
Rose China Winter Scarlet, white tipped, excellent quality

SPINACH

One ounce to 100 feet of drill.

For summer use, sow early in March; in drills fifteen inches apart, and for succession at intervals of a fortnight. For winter use sow late in August. The soil should be heavily manured and deeply trenched.

10 30 90

SALSIFY, OR OYSTER PLANT

One ounce to 50 feet of drill.

The Salsify has a long, white, tapering root, resembling a small parsnip; when properly cooked it has the flavor of an Oyster, and is a good substitute. Sow early, in drills 15 inches apart; cover the seeds an inch and a half deep.

SQUASH

Bush sorts, one oz. to 50 hills: 6 lbs. per acre. Running sorts, one oz. to 16 hills; 4lbs. per acre.

The Squash is a very tender vegetable, sensitive of cold and cannot in our climate be planted before the middle of May. Plant in rich soil, in hills prepared similar to those for Cucumbers. All sorts thinned to not over three plants to a hill.

Giant Summer Crookneck Larger than the ordinary summer crookneck 10 30 1 00 White Bush Scallop Early; a good market sort.

10 25 80

Yellow Bush Scallop Yellow flat, scalloped edge.
10 25 80

American Turban A favorite late variety.

Boston Marrow A good keeping winter sort.

10 25 80
Early Prolific Marrow The earliest and most pro-

ductive; fall or early winter variety 10 30 1 00
Golden Bronze Dark grayish green skin, bright
yellow flesh; fine grained 10 30 1 00
Hubbard The standard winter squash 10 30 1 00
Chicago Warted Hubbard A popular selection of
the well-known Hubbard, having dark green
warted shell. Large size and excellent quality.

10 30 1 00

Golden Hubbard Similar to the standard sort except in color.

10 25 8

TOMATO

One ounce will produce about 2000 plants.

The seed should be sown in a hot bed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high set out in boxes, three inches deep, four inches apart, in another hot bed or pot singly. If transplanted a second time will be stocky and branching. When the weather has become mild, transplant into warm, light, rich soil four feet apart.

Price except where noted, oz., 25c.; ¼lb., 75c.; lb., \$2.50.

Earliana The earliest large red tomato.

A favorite among market gardeners.

Pkt., 10c.; oz., 40c.

Nolte's Earliest As early, large and productive as Earliana, but of superior color and quality. Pkt., 10c.; oz., 40c.

Acme Very early, smooth, color purplish

Matchless The best; large fruited, bright red tomato.

Beauty Large, smooth, early, dark purplish pink.

Favorite Large, smooth, productive. A good shipper.

Trophy A standard late variety.

Perfection Early, regular and productive, reddish scarlet.

Dwarf Champion A distinct variety; robust, short jointed; fruit early, medium size, crimson color.

Aristocrat Similar to above; glossy scarlet color.

Lorillard Bright, glossy red, excellent for forcing or outdoor culture.

Stone A remarkable main crop variety. Smooth, solid and very little seed capacity, very productive and quality is unexcelled.

Crimson Cushion Extra large, bright crimson.

Table Queen Large, smooth, round, solid.

Ponderosa The largest variety in cultivation. Oz.,

40c: 1/1b., \$1.25.

Golden Queen A large, smooth, yellow variety. Strawberry (Husk.) A favorite preserving sort.

TOBACCO

One ounce will produce plants for one acre.
Sow broadcast in hot beds or in open ground soon as ground can be worked. Keep free from weeds and water freely in dry weather. Set out about June 1st three feet apart on highly manured ground.

Flax Seed 11/2 bushels to the acre. Prices variable. Canada Field Peas Valuable for cattle feeding, excellent for ensilaging, or sown broadcast in the spring and harrowed in. . Vetches, Spring Sown mixed with oats for soiling.

Kaffir Corn Excellent for fodder: per lb., 10 cents: 100 lbs., \$6.00.

Rape, Dwarf Essex A prolific foliage plant for sheep pasture. Sow 5 pounds to the acre in drills. Per ib., 15 cents; 100 lbs., \$6 00.

Grass Seeds

Prices may Change as the Season Advances.

Rhode Island Bent One of the best grasses for lawns in adapting itself to almost any soil, dry, moist or sandy. Valuable for permanent pastures. Per lb., 25c.

Kentucky Blue (Poa Pratensis) A superior grass for pastures and lawns. Succeeds well in all soils

and stands dry weather well. Per lb., 15c.

Orchard Grass (Dactytis Glomerata) One of the earliest grasses and very hardy. Should be sown with Red Clover, as it blossoms about the same time. It is very productive and makes excellent hay. Grows well in shady woodlands, but do not use it for lawns. Per lb., 20c.

Timothy (Phleum Pratense). A variety well known

and highly appreciated. Produces large hay crops

if grown on moist, clayey soil. Market price.

Red Top (Agrostis Vulgaris) A hardy perennial grass, succeeding best on moist land. Used extensions, in all and the second sively in all pasture mixtures, remaining green the greater part of the year. Per lb., 15c,; 100 lbs., \$13.00.

Sweet Vernal (Anthoxanthum Odoratum) perennial grass used in pasture mixtures. Per 16.,50c.

Tall Meadow Oat Grass (Avena Elatior) An early grass much relished by cattle, and produces an abundant supply of foliage. It is hardy and valuable for pasturage. Per lb., 30c.

Hard Fescue (Festuca Duriuscula) One of the best dwarf grasses; excellent for dry soil. Hardy and withstands long periods of drought. Per lb., 15c. Crested Dog's Tail (Cynosurus Cristatus) An excellent grass for hilly situations and shady parts of lawns, thriving best on rich, moist land. Per

Meadow Fescue (Festuca Pratensis) A valuable grass for permanent pastures. Very productive

and nutritious Per lb., 20c.

Rough Stalked Meadow Grass (Poa Trivialis)

Produces an abundant crop of highly nutritious herbage. Grows well on rich, moist lands and sheltered situations. Per lb., 35c.

Sheep's Fescue (Festuca Orina) An excellent grass for sheep pastures. Perfectly hardy, dwarf, compact growth. Per lb., 20c.

Meadow Foxtail (Alopecurus Pratensis) One of

the earliest and best pasture grasses; grows rapidly when cut or eaten down by stock. Should only be sown with other grasses. Per lb., 35c.

Creeping Bent (Agrostis Stolonifera) One of the

best lawn grasses; succeeds well in deep soils.

Per lb., 30c.

Wood Meadow Grass (Poa Memoralis) Chiefly used for shaded positions in lawns and woodland parks, where other grasses will not grow. Per

English Rye Grass (Lolium Perenne) A very nutritious, rapid growing grass. Valuable for meadows and pastures. Per lb., 12c.

Clovers

Alfalfa (Lucerne) Requires a deep, rich soil, and in such will produce several crops every season; one of the best green fodder plants; 10 to 15 lbs. to the acre. Per lb., 20c.

Alsike Clover (Trifolium Hybridum) Resembles in growth, duration, etc. the Red Clover; thrives well in cold, wet and stiff soils; 10 lbs. to the acre. Per lb., 25c.

Medlum Red Clover (Trifolium Pratense) Is a perennial, but of very few year's duration; is considered the most nutritious of all species and most valuable in moist locations. Market prices.

White Clover (Trifolium Repens) Valuable for

lawns and pastures. Per lb., 3oc.

Yellow Trefoil (Medicago Leucantha) May be cultivated either alone or with other grasses. Requires about the same treatment and soil as Red Clover, although thriving in dry and inferior soils. It sprouts very early in spring; is of excellent quality, and is considered a fine pasture for sheep;

15 lbs. to an acre. Per lb., 20c. Crimson Clover (Trifolium Incarnatum) Sown at the last of summer or early autumn; it furnishes a very early green fodder; excellent for soiling; 20 lbs. to the acre. Per lb., 12c.

Millets

German, or Golden Millet Medium early; height 3 to 5 feet; heads closely condensed; spikes very numerous; seeds round, golden yellow, in rough bristly sheaths. Per bushel (50 lbs.), \$1.75.

Hungarian Millet (Panicum Germanicum) One of the most valuable annual soiling plants. It will grow in any ordinary soil, withstands drought well,

and in this latitude may be sown as late as the first day of July, and produces a large green crop; 1½ bushels to the acre. Per bushel (48 lbs.). \$1.75.

Japanese A new millet. Very productive if sown

Japanese A new millet. Very productive if sown early and cut; usually produces a good second crop. Has produced six tons dry hay per acre. Sow r bushel to acre. Per lb., roc.; per 100 lbs., \$8.00.

FLOWER SEEDS

Our stock of flower seeds has been selected to supply the wants of a critical florists' trade, and our customers may be sure of receiving nothing but seeds of the finest quality.

All flower seeds in packages, ounces and one-fourth pound mailed free at prices; larger quantities, add eight cents per pound.

STOCKS

Stocks German, ten weeks. Splendid for bedding or pot culture, free blooming, and covering a wide range of color. Large Flowering Pure White, Blood Red. Rose, Canary Yellow, Lavender, Finest Mixed Snowflake Dwarf. Pure white, splendid for pots Princess Alice (Cut and Come Again) Pure white, perpetual flowering

SWEET PEAS

Fragrant climbing annuals. Seed should be sown early in spring to enable the vines to get a good strong growth before the warm weather. Make trenches six inches deep, in which the seed should be sown, covering them two inches. As soon as the plants show through, fill in the trench, which will secure a deep root and allow blooming through the heat of summer. Keep the flowers picked off as fast as they come into full bloom, for if the pods are allowed to form, the plants will stop blooming.

Summer Flowering Bulbs

CALADIUM-Esculentum This is one of the most beautiful and striking of the ornamental foliage plants, for growing in pots or for planting on the lawn, or masses in beds. It is of the easiest cul-ture, and will grow in any good garden soil.

Dry Bulbs 10c. each, \$1.00 per doz.; large, 15c.

each, \$1.50 per doz.

Tuberous Rooted Begonias Plant about May 15th and you will have a mass of beautiful foliage set off with unsurpassed sprays of immense flowers, measuring from 4 to 7 inches across. The shapely glistening leaves gracefully droop, and form a dense oval pyramid, while this is crowned with an un-broken mass of flowers endless in color—from the warm rich scarlet, soft rose, golden yellow, pure white, etc.-making a most surprising sight. plants are covered with bloom the entire season. When the foliage dies down in September or October, they should be set away in a warm, dry place to remain until planting time the following spring.

Single White, Yellow, Scarlet, Pink, Dark Crimson, Orange. Price of above, 10c. each; 75c. per doz.;

\$5.00 per 100

Double Flowering varieties, 10c, each; \$1.00 per doz.

GLOXINIAS Should be grown in pots in the house or on the veranda, in boxes or little frames outside, and will flower all summer. Their green leaves are surmounted with a cluster of lovely trumpet-shaped flowers. The coloring is exquisite; the groundwork of many is pure white, with throats of blue, scarlet, rose, or crimson; or the tubes are of

bright color with white throat. The bulbs should be started in a warm place—greenhouse, hot bed, or sunny window. Early in the fall they should be dried off, letting the leaves die; the pots can be kept over winter in a cellar free from frost. Price, strong bulbs, mixed colors, 10c. each; dozen, \$1.00. By mail, postpaid.

Madeira Vine A rapid growing vine with fragrant white flowers. 5c. each; 4oc. doz.

Gladiolus Bulbs planted in open ground in spring produce plants with long, rush-like foliage and magnificent flower spike early the following autumn

Childsie Finest Mixed Giant flowering 40 3 00 Groff's Hybrids Mixed A new and exceedingly popular/strain ingly popular/strain. White and Light Extra quality, very choice varieties and select bulbs 50 3 50 Augusta Victoria The finest white sort, 5c. each; \$1.50 doz.

Striped and Variegated Buff. .

Japan). The flowers are pure white, thickly studded with crimson spots, while through the centre of each petal runs a clear golden band. Flowers measure nearly a foot across, produced abundantly; deliciously fragrant, 2 to 5 feet. First size bulbs, 15c. each; \$1.50 per dozen.

Elegans, or Thunbergianum Early flowering, ranging in height from 14 inches to 4 feet; flowers cup-shaped, borne upright, and of a great variety of colors. They are very effective planted either in lines or clumps. Mixed bulbs, each 15c.; doz.,

Tigrinum Splendens (Improved Tiger Lily) Reddish salmon with dark spots. Each 15c.; doz. \$1.25. Tigrinum Flore Pleno (Double Tiger Lily). Each 15c.; doz., \$1.25.

SPECIOSUM VARIETIES They are hardy, needing very little protection, and will grow and flower without special treatment.

Album This is a pure white and very fragrant variety, with beautifully recurved petals. A very fine

sort. Each, 15c.; doz., \$1.50.

Rubrum White ground, with bands and spots of rose or crimson on each petal. One of the best lilies. We have a splendid stock of this very hardy and beautiful kind. Each, 15c.; doz., \$1.50.

Roseum White ground, with lighter spots of rose and red than the above. Each, 15c.; doz., \$1.50.

UBEROSES In this latitude May 1st is ample time to plant in the open ground, but the bulbs can be started in pots much earlier if desired. Select a warm soil and a sunny spot. The soil should be rich, but no special preparation is necessary, Place the bulb so the top will be covered about one inch with soil.

Excelsior Pearl Extra fine large flowering bulbs. 5 cts. each; 35 cts. per doz.; \$1.75 per 100 Add 10 cts. per doz. if sent by mail.

We import large Quantities of FALL BULBS and handle strictly first quality Our Annual Bulb Catalogue will be issued September 1st. Send for it.

OXALIS These summer flowering bulbs should be planted out early in May, about two inches deep. Mixed colors, 20 cts. doz.

MONTBRETIAS Hardy, summer flowering, bulbous plants, with brightly colored flowers, borne in

long spikes. Varieties, 50c. per doz. CANNAS 10c. each; 75c. per doz.

Madam Crozy Crimson scarlet, bordered vellow. Queen Charlotte Similar to above, with broader vellow edge.

Florence Vaughan
Alphonse Bouvier
Golden yellow spotted crimson.
Finest tall crimson.

Alsace Sulphur vellow, turning to pure white. Gloriosa Dark crimson, widely margined yellow.

Fertilizers

Sheep Manure, Pulverized This is a pure natural manure, and the most nutritious food for plants. It is excellent as a top dressing for lawns. Its effect is immediate and much more lasting and healthy than guano or any other manure. There is nothing better for mixing with the soil for greenhouse plants; one part manure and six parts soil. For use in the vegetable garden, placed directly in hills or drills, it promotes a rapid and steady growth. It makes the richest, safest and quickest liquid manure. One pound to five gallons of water; 2 lb. package, 15c.; 5 lbs., 25c.; 10 lbs., 40c.; 100 lbs., \$2.00.

Unleached Hardwood Ashes As a fertilizer for lawns, gardens and fruits, Hardwood Ashes are unequalled; they are not a mere stimulant, but supply natural plant food, permanently enriching the soil. Clean, free from offensive odor, and can be applied by any one. They are exceedingly valuable for lawns, imparting a rich dark shade of green and destroying many of the insects which are so injurious. Price per barrel, \$2.00.

Mitchell's Special High Grade Fertilizer tains all the necessary elements of plant food, in the most obtainable form to meet the wants of all plants in all periods of their growth. Market gardeners use it in preference to all other makes for growing tomatoes, cucumbers, corn, peas, beans and cabbage. Guaranteed to contain ammonia, 4½ per cent.; phosphoric acid, 9 to 11 per cent.; actual potash, 6 to 7 per cent. Per 100 lbs., \$2.00

Land Plaster Used for preventing bugs from destroying cucumber, melon and squash vines. Price, package, 25c.; 100 lbs, 75c.

Bowker's Food for Flowers A dressing made expressly for plants grown in the house, garden or conservatory. Clean, odorless,

and producing early and abundant blossoms, and healthy, luxuriant plants. Small package, enough for thirty plants for three months, 15c. each. Large package, 25c.

Bowker's Lawn and Garden Dressing Prepared from chemicals free from weed seeds, clean to handle and easily applied. Per 100 lbs., \$3.00; 25 lbs., \$1.00; 10 lbs., 50c.; pkg., 10c.

Pure Ground Bone Meal This finely pulverized ground bone is excellent for rose culture; top dressing for lawns and for potted

plants, 5 lb. package, 20c.; 10 lbs. 35c.; 50 lbs., \$1.00; 100 lbs., \$1.75.

Nitrate of Soda This is valuable solely for the nitrogen it contains, equal to 20 per cent. of ammonia. It is chiefly a stimulant, and is used in addition to other fertilizers. It is very quick in action and hastens the maturity of crops fully two weeks. Being extremely soluble it should not be applied until the plants are above ground, when or land plaster, for convenience in applying, are generally used. 5 lbs., 30c.; 10 lbs., 50c.; 100 lbs., \$3.50.

Grape, or Inch Bone For grape vines, fruit trees, shrubs and trees of all kinds. Should be used in setting out, mixed with the soil to the depth of a

foot or more. Price, \$2.00 per 100 lbs.

Insecticides

Aphis Punk A special preparation of nicotine, for the extermination of green and black fly, thrip, etc. Not injurious to delicate plants. Per package, 12 rolls, 60c

Bordeaux Mixture For all fungoid diseases, such as mildew and various rots of grapes, etc. Prepare by adding one gallon of mixture to 49 gallons of

water. I gal. can, \$1.00; I qt., 40c.

Bug Death A non-poisonous powder that takes the place of Paris Green and other dangerous insect powders. When used as directed it is sure death to potato, squash and cucumber bugs, current and tomato worms, etc. It is applied dry, and will not blow or wash off. I b. 15c.; 3 lbs., 35c.; 5 lbs.,

50c.; 12½lbs., \$1.00.

California Wash (Lime, Sulphur and Salt.) This preparation is scientifically prepared and is widely recommended and known as the best preparation for San Jose's scale, oyster shell scale, etc. for use by adding 20 to 40 gallons hot water to each

Canker Worm Exterminator (Morrill's). protection for fruit and ornamental trees from the ravages of the grub and canker worms. Directions with each can. 2 lb. can, 30c,; 5 lb, can, 60c gallon of mixture. 1 gallon, \$1.00.

Death to Lice (Lambert's). An effective remedy for all kinds of poultry vermin. Package 25 and

so cents

Fir Tree Oil One of the most reliable for red spiders, green fly, mealy bug, caterpillars, slugs, blight, etc. Dilute with water and apply with ordinary syringe or bellows, or by dipping the plants. Per

pt., 75c.; qt., \$1.15; gal., \$4.00.

Fir Tree Oil Soap Useful on greenhouse and garden plants, killing red spider, mealy bug, aphis, In the vegetable garden for potato bugs, cabbage worms, etc.; on trees for caterpillars, etc. Does not injure fruit or foliage, and there is not the slightest danger of poisoning from fruit or vegetables where it is used. Per 1/2 lb. tin, 25c.;

2 lbs., 75c.

Grape Dust A preparation to kill the destructive mildew that strikes the grape vine; also for like use upon any other plants or trees affected with mold, mildew, or rust mites, either in greenhouses

or the open air. 5 lb. packet, 30c.

Hellebore Powdered White Hellebore for rose slugs, currant worms, etc. Dust on with gun or bellows while the foliage is moist. Per lb., 25c.

Kerosene Emulsion For aphis on all plants. Ready for use by simply adding water. Quart, 40c.; gal-

lon cans, \$1.00.

Nico-Fume A tobacco paper for fumigating greenhouses. Does not injure blooms and furnishes the easiest method of fumigation ever devised. Cans of 24 sheets, 75c. 144 sheets, \$3.50.

Nikoteen Is the cheapest, cleanest and most effective of insecticides, and will not injure or discolor delicate plants. It is composed of that element in tobacco which gives it its value as an insecticide and nothing else. Bottle, \$1.50. Vaporizing pans, St. so each

Paris Green Superior quality. Lb., 20c.

Persian Insect Powder Effective against almost all kinds of insects. 1/2 lb., 25c.; I lb., 40c.

Rose Leaf Tobacco Extract Highly concentrated extract of tobacco, recommended for use in greenhouses for destroying insects and scale on plants. Gallon can, \$1.25. 5 gallon can, \$5.00.

Slug Shot Destroys all insects injurious to house and garden plants, vegetables and fruits of all kinds. Equals Paris Green when used liberally, without the danger from poison. Price, 5lb. package, 25c.

Sulphur, Flowers of A staple preventive for mildew on grapes, roses, etc. Lb., ioc.; iolb., 5oc. Thanolice The best powder to use on poultry,

horses, or cattle; easy to apply. 1 lb. box, 25c.

Tobacco Dust If dusted on while the foliage is moist

it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off earth insects, and acts as a fertilizer. Per lb., 10c.; 5 lbs., 25c.; 100 lbs., \$3.00.

Tobacco Stems for Fumigating Price on applica-

Weedicide The greatest weed killer. Will keep walks, drives, croquet grounds and tennis courts free from weeds and grass of all descriptions. I gallon sufficient to make 20 gallons, \$1.00.

Whale Oil Soap Makes an excellent wash for trees and plants; kills insects and eggs on the bark. Per lb., 15c.

Poultry Supplies

CONKEY'S ROUP CURE

A guaranteed remedy for all forms of roup. Directions in each package. Price per package, 50c.

Price, 3c. each; dozen 25c.

FIDELITY FOOD FOR CHICKS

A safe and nourishing food for chicks just out of the shell, and one that could be depended upon to carry them right along until fully matured. food is given dry, though plenty of pure water should always be on hand for the little fellows to drink. or even moist foods are highly objectionable and altogether unnatural to all gallinaceous birds, and they should never be employed except in the process of fattening for the market. Young chicks must be kept warm, and moist foods in a warm room speedily turn sour, causing the chicks to dwindle away and die. Price, 5c. per lb.; 50 lbs., \$2.00; 100 lbs., \$3.50.

PRATT'S POULTRY FOOD

A cure and preventive of chicken-cholera, roup, gapes and other diseases. Young chicks grow quickly and healthy. Molting fowls when fed Pratt's Poultry Food will make them lay sooner and will increase the quantity of eggs. Price, 26 oz. package, 25c.; 5 lb. package, 6oc.; 12 lb bag, \$1.25.

IMPERIAL EGG FOOD

Invaluable for chicks and molting fowls. A standard, reliable food. Price, 26 oz. pkg., 25c.; 60 oz. pkg., 50c.

BOWKER'S ANIMAL MEAL

Is prepared from fresh beef and bone, which are dried and cooked by steam and then ground to an easily digested meal that is sweet, concentrated and nutritious. Directions for use of on each package. Price, to lbs., 350

SHERIDAN'S CONDITION POWDER

Prevents and cures diseases of hens. It is strictly a medicine to be given in small doses once daily in their food. Price per package, 25c.; large pkg., 8oc.

DEATH TO LICE OINTMENT

Used for head lice on chickens. 1 oz. package, toc.

CLOVER MEAL

Pure Clover Hay ground to a fine meal, a practical form in which to feed it to fowls, as it is prepared by simply pouring enough hot water over it to make it crumbly. 50 lb. bag, \$1.10.

MICA CRYSTAL GRIT

For Chickens, Geese, Turkeys, Pigeons and Birds. It makes thorough digestion of food possible. Two grades for Chicks and Poultry. Price per package, 10c.; 100 lb. bag, 60c.

GROUND OYSTER SHELLS

Furnishes one of the best sources for Shell-making Material. Thoroughly washed and dried. Price per package, 10c.; 100 lb. bag, 75c.

ROUP PILLS

For Roup, Swell Head and canker in fowls. Directions on each box. Price per box of 50 pills, 25c. EGG TESTERS

Made of Tin; will fit any small lamp. Each, 35c. POULTRY MARKERS

Made in two sizes. Each. 250.

DRINKING FOUNTAINS

Sanitary, square, galvanized, in two parts, easily cleaned and filled. Price, I gallon, 50c.

SANITARY EARTHENWARE

In two parts, large drinking surface. Price, 2 pt., 25c.; 3 pt., 3oc.; 4 pt., 35c. each.

SANITARY FEED BOX

Made of galvanized iron, with three spaces, 50c.

LEG BANDS

Copper, flat. Per doz., 250 INSECT POWDER BELLOWS

Each, \$1.00 and \$2 00. INSECT POWDER GUN

Useful in dusting hens with powder. Each, 10c. and 20c.

Garden Tools and Requisites

Bellows Woodason's Powder. For Hellebore, Tobacco Dust. etc. Each, \$1.00 and \$2.

Bellows Sulphur Used only for sulphur. \$1.50.

Dibbles Used in transplanting cabbages, etc. Steel

points, 35c. each.

Forks Digging or spading, 75c. each. Hay or stable, 35c. to 75c. each. Manure, long or short handles, 50c. to \$1.00.

Hoes Draw, with handles, 35c. and 4oc. each. Hoes, Scuffle or Dutch, 40c. to 65c. each. Plympton, 60c. Warren, 6oc.

Hose Rubber, 3/2 inch, best quality non-kinkable, cut any desired length. 18c. per foot.

Rubber, extra quality, recommended for greenhouse use, 3/4 inch, 16c, per foot. In 50 feet lengths coupled.

Fumigators Eureka. For smoking greenhouses with dampened tobacco stems. No. 2 kolds 1 peck of stems, \$2.00. No. 3 holds

½ bushel stems, \$2.50. No. 4 holds ¾ bushel of stems, \$3.25. Garden Lines Hemp, braided, 100 feet, 50c.

Reels For above, 50c. each.
Glazier's Points, Van Reypers
The only durable and reliable
points. Made of steel wire and galvanized. Per box of 1000, 60c.

FUMIGATOR Pincers For same, 40c Grafting Wax 1/4 lb. package, 10c.; ½lb., 15c.;

1 lb., 25c.

Grass Hooks English, each 50c. and 60c.

With mixer. Tennent Atomizer The newest and best spraying device on the market, for greenhouse use, trees, shrubbery, vines, henhouses, etc.

The spraying tubes are so arranged that it will spray overhead which no other hand sprayer will do. \$1.00 each.

Hose Nozzle Boston Rose Spray. Copper face, flat. One of the best nozzles for the greenhouse, flower garden or lawn, 50c. each.

Hose Nozzle Bordeaux The simplest and best spraying nozzle made for 1/2 inch hose, 75c. each.

Hose Nozzle Rainmaker, 5oc. each.

Hose Menders Cooper's. Made of heavy brass, requires no wire or plyers to adjust them. For ½ inch or ¾ inch hose, dozen, \$1.00. I inch, \$1.25 doz.

Hose Couplings Set, 200.

Hot Bed Mats Palmer's. Wool filled, frost proof. Made expressly for winter covering of hotbeds, cold frames, plants, etc. 76 in. x 76 in., \$1.25 each.

Knives Budding. Imported, \$1.00 to \$2 00 each. Knives Asparagus. For cutting asparagus under

the surface, 40c. each,

Edging Knife Handled, 50c.

Lawn Rakes Wooden, best quality, 50c. each.

Lawn Rakes Wire, reversible, 50c. each.

Lawn Sprinklers Peck's Improved. Standard, 4 feet high, arms revolve, scattering a fine spray evenly over a space 50 feet in diameter. 4 arm sprinkler, \$3.00; 8 arm sprinkler, \$3.50.

Lawn Sprinkler Water Witch, No. 3, 75c. each. No. 4, \$1.20 each.

Garden Tools and Requisites-Continued

Lawn Sprinkler-Twin Comet The body of sprinkler is made in two parts and by means of the swiftly revolving arms and intermediate gears the upper half is made to revolve slowly, carrying the hose nozzle, from which a full stream of water is thrown far out beyond the sprinkle of the arms, thereby covering a larger space than any other stationary sprinkler. Price, \$5.00.

Mastica For glazing greenhouses, sashes, etc. Superior to putty, as it will not become hard and brittle. Being elastic, it is not affected by expansion and contraction. Per gallon, \$1.25.

Mastica Glazing Machine Each, \$1.25.

Water's Tree. This pruner never fails to cut the slightest twig. It is the cheapest and most practicable pruner on the market. 6 feet, 75c.; 8 ft., 85c.; 10 ft., \$1.00; 12 ft, \$1.10.

Pruners Telegraph, without han-

dles. \$1.25 each.

Pumps Success Bucket Spray. The best and most durable portable hand pump. It has large air chamber, double acting, throwing continuous stream either solid or in fine spray, \$3.75 and \$4.00.

Auto Spray Pump A self-operating sprayer of sim-

ple construction. easy to carry and to work; for spraying grape vines, bushes, shrubs, etc. Made of brass. Price, \$6.00. Galvanized iron tank, \$1.50. Brass extension pipe, 30c. extra.

Ratfia The best material for tying plants; soft, strong and pliable. Per lb., 20c.

Scythes Cast steel, best quality, \$1.00 to \$1.50.

Scythe Stones Talacre, oval, 20 cents each.

Shears Grass border, English. 9 inch, \$2.50; 10 inch, \$2.75.

Rollers The benefit derived from the use of a roller on the lawn, especially in the spring, is not fully understood. The action of freezing and thawing causes the ground to heave, and if the sod is not firmly pressed back with a roller before the hot weather begins, the grass is apt to be killed or injured, leaving the lawn full of bare spots. The Rollers we offer are made of first-class material, outer edges being beveled to prevent cutting sod. and face of roller is turned perfectly smooth.

Nitro-Culture Endorsed by the U.S. Department of Agriculture

The U.S. Department of Agriculture says: "It is worse than useless to attempt to grow any leguminous crop without being certain of the presence of the bacteria which enable the plants to fix free nitrogen. tain regions are practically devoid of the right kind of bacteria, and unless some artificial means of inoculating the germs be resorted to the crop will be a failure.

IMMENSE CROPS WITHOUT FERTILIZERS

COMMON BEAN

Beans grown and photographed by George W. Dibble, Fernvale, Alabama.
On the left, inoculated with Nitro-Culture; right, not inoculated, but in same patch.

PRICE LIST

Nitro-Culture, sufficient to inoculate the following seeds per acre, mailed to any address in the United States or Canada at the following prices:

Alfalfa	,					1		per	acre,	\$2	00
Red Clover .								-	8 t		00
Crimson Clove									6.6	2	00

Guaranteed to keep six months from date of shipment and can be used within that time.

A new, sure and easy way has recently been discovered to make worn-out or poor land enormously productive without fertilizers and almost without expense. Plants need nitrogen—can't grow without it. Heretofore fertilizers have been needed to put nitrogen into the soil. Nitrogen is very necessary—is the most expensive part of fertilizers. The new way is easser. surer, cheaper-it is to let nitrogen gathering germs feed the plants.

The soil is full of air. Air is four-fifths free nitrogen. Think what limitless plant food, in the form of *free* nitrogen, the air contains. Right here the new discovery comes in. Plants can't extract nitrogen from the air, but there are germs that can. These germs have been discovered and are now being used for that purpose.

These germs, when put into the soil, fasten themselves to the roots of the plants, draw the free nitrogen out of the air, and feed it to the plants. That's the secret of the new way that is making many farmers rich. The germs do the work—the farmer gets the profit. They save expense, reduce the work, increase the crop enormously, even make it possible to grow Alfalfa and other crops where they never would

grow before. The new way saves the cost of fertilizers and is very easy to use. The germs come ready for use, in a form called **Nitro-Culture**. Nitro-Culture is put up in small dry-packages you can put in your vest pocket. Simply add it to water, and sprinkle the water over the seeds before planting. The germs remain on every seed—live with it—increase about it—feed the roots when they start and keep on feeding them. They also enrich the soil by storing nitrogen in it, so that the second year's crop, whatever it may be, is increased from two to ten times.

ALFALFA, OR LUCERN

Specimen plants characteristic of uninoculated and inoculated field of Alfalfa, on farm near Bynum, Hartford County, Maryland. The unin-oculated plants turning yellow, though sown on ground richer and better than the inoculated field. Gan from inoculation with Nitro-Culture nearly 500 per cent. by weight.

COLDWELL'S HORSE LAWN MOWER

Coldwell's Improved Horse Mowers are fitted up throughout with the best steel shafting, composition bushings or bearings, polished oak footboards, etc.

Unquestionably the best Horse Lawn Mower manufactured, and guaranteed to give entire satisfaction.

30-inch, with seat and shafts, \$ 65.

35-inch, with seat and shafts, \$75. 40-inch with seat and shafts, \$90. Furnished with side draft attachment, which keeps the horse on the cut grass only.

TOWNSEND'S HORSE LAWN MOWER

Triple rolls with triple pawls in each roll, making the most powerful and instantaneous driving mechanism ever put in a lawn mower.

This feature maintains the motion of the blades even in turning sharp corners, and forms a strong contrast with other double roll Mowers whose knives have no motion when turning corners.

It is made very strong and powerful, of the very best materials, and finished in the most perfect manner.

It will cut over very rough and uneven ground and stand very rough usage, and still will get down into the turf and cut its swath clean, easily and smoothly. It is, on this account, very popular with golf clubs.

We warrant it superior to any mower ever built, and we will refund the purchase price to any customer dissatisfied after a trial.

Furnished with seat, handles and shafts complete, and made 30-inchor 38-inch width of cut. Price \$60 to \$80.

"LION" BALL BEARING LAWN MOWER

The ball bearing in lawn mowers is the latest and probably the greatest improvement in their manufacture. The "Lion" is constructed with 10-inch skeleton rim driving wheels, 6¼-inch cutting cylinder, with five knives. Is a strong and powerful easy running mower.

For those who mow their lawns frequently we advise the use of fine blade machines, as they leave the lawn in a very

smooth condition.

16-inch, \$10. 18-inch, \$11. 20-inch, \$12.

UNIVERSAL

A SUPERIOR QUALITY LOW PRICED MACHINE

This mower is built to accommodate those who have but little grass to cut and wish a low priced machine, yet one that will do good work. While this machine should not be compared with strictly high grade mowers, yet we consider it an excellent machine for moderate use. 14-inch, \$3.75.

ROLLER LAWN AND GOLF MOWERS

On lawns, where exceptionally fine cutting is a necessity, there are no mowers to equal these. They cut smoothly, effectually doing away with that wavy appearance so often seen on a freshly cut lawn. They will also roll down a new lawn and protect it against upheavals caused by dampness, ants and other insects. These are the only mowers that will cut borders properly and without danger of cutting the sod.

Price, 18-inch, 6 blades, \$15.

"IRON AGE" COMBINED SEED DRILL AND DOUBLE WHEEL HOF.

The Seed Drill is complete in itself merely requiring to be bolted with two bolts to the wheel frame. As a drill it opens the furrow, drops the seed, covers and rolls it and marks the next row at one passage. It can be set to sow shallow or deep, thick or thin, as desired, and handles all garden seeds. The flow of seed can be instantly shut off to turn rows. The agitator is a revolving brush, which will not injure seed in the slightest.

Price, \$10.

UNIQUE WHEEL HOE

The "Unique" Wheel Hoe is the only hoe that gives entire satisfaction for cuting over yards, walks, driveways around private grounds, and for clearing up avenues and drives in cemeteries and parks. It is light, strong and durable, and does most satisfactory work where other hoes have failed. The steel blades are exceptionally hard and heavy, so as to give little wear and great resistance. Being easily adjusted to any height and pitch, the long, tedious work of the hand hoe is superseded by ease and facility.

The blades are 10 inches to 14 inches in length. Price, \$2.50.

EUREKA WEED HOE

One of the most practical and simple weeders for the purpose of cultivating close sown crops. It is light and easy to handle; the blades can be set at any distance apart and the handle adjusted to height of operator. This hoe straddles the row—thereby doing away with half the labor and yet it passes clearly over plants up to twenty-four inches high. Price, \$4.50.

THE "NEW MODEL" SEED DRILL

Drills of similar construction are usually provided with a series of holes of varying sizes through which the seed is passed, which of course, do not always give an opening of the exact size required. As will be readily seen, by reference to the sectional cut, this adjustment is accomplished by use of a pearshaped opening, passing under the bottom of the seed reservoir, which is provided with a perforation of similar shape in a reversed position. This slide can be instantly adjusted to size indicated by index. The index is placed in open sight, immediately under the eye of the operator, and as stated above, can be quickly adjusted to the slightest variation desired. As the names of the principal seeds are plainly shown on the index itself, it is not necessary to refer to any table of reference. The flow of seed can be instantly stopped by a swinging cut-off, conveniently operated by a cord and ring on handle.

"IRON AGE" DOUBLE WHEEL HOE

For the cultivation of garden crops, it is an indispensable implement. With it one person does the work of several men with great ease. One great advantage which this double wheel hoe possesses is that it can be made into a practical single wheel hoe in a moment's time. The wheels are 16 inches high, enabling the wheel hoe to run easy and without yielding to the depression of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. Price, complete, \$6.50.

THE "GEM OF THE GARDEN" WHEEL HOE Single Wheel Hoe

No greater proof can be given of the popularity of a tool, or of its intrinsic worth, than the one simple fact of a continued demand for it. In the past few years there have been placed about fifteen thousand of the "Gem" Wheel Hoes in the hands of gardeners, and we are not aware of a single instance in which it has failed to give entire satisfaction to the user. It is not a toy, neither is it a tool made of light gray castings, calling for constant repair, the "Gem" being largely made up of steel and malleable iron. The set of slender stirring teeth, each stamped from one piece of steel, cannot be excelled for thorough work, especially in hard soil. Price, complete, \$4 50.

THE "IRON AGE" HILL AND DRILL SEEDER

This is the most complete tool ever offered by the manufacturers of the "Iron Age" implements. It has only been placed upon the market after a most thorough experiment and field tests. The wheel is 16 inches high, made of steel, with a 2-in. tread. The opening plow is clog proof and can be instantly adjusted. The hopper is low; therefore the delivery of the seed is close to the ground, thus making possible accurate spacing.

The distance of spacing the seed can be instantly changed by simply removing a small wheel at the side of the hopper and reversing it, or by putting on another.

The flow of seed can be instantly stopped or started by a convenient finger latch on the handle.

Price, \$10.

"IRON AGE" SINGLE WHEEL HOE

With Cultivator Teeth, Plow and Rakes

This tool is, in regard to the work done, almost a counterpart of the Double Wheel Hoe, and the same remarks as to its construction, extreme lightness and ease of operation will apply with equal force. For the small kitchen garden we consider the single wheel hoe as being preferable. The work is done principally between the rows, although plants of small growth can be hoed on both sides at once by placing the wheel on the left side. With this single wheel tool, spaces of exceedingly narrow width can be worked even using but one cultivator tooth. With the large plow attachment, deep furrows can be opened or closed; potatoes, celery and other crops hilled—in short all work usually accomplished by a special plow.
